

## CELEBRATION OF THE SEASON OF CREATION :2022

### Taking care of the animals: -Job.12:7-8

“Ask the animals and they will teach you, the birds of the air and they will tell you..”Everything in the creation is children of God the Father and thus brothers and sisters to one another. God wants us to help the animals too when they are in need. Here we share our affection and care for these little creatures by visiting them and spending time with them, giving them grass, fruit’s peals, leaves etc.

Catechism Class:-Children are the gifts for the family. They are the buds of Jesus. We take care of the children of our Parish by taking Catechism classes, teaching them how to pray, teaching them the Gospel values and moral values, so that they become a blessing to their family, Church and to the whole creation.

Keeping the surrounding clean:-Making the children aware of the need of cleanliness. Encouraging them to keep the surroundings neat and clean. Through this activity the children learn to keep themselves and the place clean where they live. By keeping the place clean we save ourselves from various sicknesses also by doing this, children learn to take care of the Mother Earth.

Taking care of the sick:-When the children get sick in the school, they are taken care with love and tenderness. When they get hurt while playing they are given first- aid .If the child is very sick or the injury is so much the parents are called and the child is taken to the nearby hospital for the treatment and School bears the expenses.

**Visiting the old parents:-** We go to visit the old, helpless and the sick people in the neighbourhood. We share God's love by listening, comforting and being with them and sharing with them some food. They feel very happy when we visit them and we too feel happy.

**Save trees save life:-**

Through the activity of embracing the tree, we made the children aware of the importance of trees in our life. Trees give us clean air to breathe, clean water to drink, shade and food to humans, animals and plants. They provide habitats for the birds, firewood for cooking, materials for buildings and places for spiritual activities. Thus we are interconnected and interdependent, they are part of our life and it our prime duty to take care of them.
