

## Sankosai

To protect and safeguard the ecology and our mother earth we are concentrating on the future generations, Poor children from our neighbourhood without any disparity no cast creed or religion, the most vulnerable living a pitiable life without any amenities of life. We educate them to keep themselves, clean their house and surroundings and dispose all the waste products hygienically without any health hazards. We provide them with flower plants and herbs to plant in their courtyards and surroundings to keep their house and surroundings free from collecting garbage and keep it clean and healthy.

We also concentrate on the destitutes, physically handicapped and the old people who live in abject poverty and no means to live on, have no access to get the benefits from the government schemes like old age pension, pension for the disabled, benefits of PDS, ration for all, and to make adhaar card etc. so that they too may benefit from the government. Schemes purely meant for them. Through local leaders we are trying to redress to the suffering so that they too may have their rights met and live a dignified life.
