

## **Listen to the voice of creation.**

### **Introduction**

We listen to the cry of our mother earth, the cry of the poor and the cry of our future generations. Now the time has come to look deeper into our ourselves in the light of God's spirit and the charism of our institute to discern God's plan for our personal and communitarian conversion to become the transformative agents in our Church and the society to care for our common home mother Earth. The violence present in our hearts, wounded by sin is also reflected in the system of pollution evident in the soil, in the water, in the air and in all forms of life.

When we see God's creation being destroyed by all the human beings, we feel sad, pained and guilty towards the mother Earth for we not being sensitive and grateful to the creation of God.

We hurt the mother Earth when -

- We cut trees and plants, which leads to deforestation
- We pollute air, water and soil
- We waste resources such as electricity
- Water electricity is being wasted unnecessarily.
- Poor are being tortured and corrupted by the rich.
- Mother earth is being polluted by throwing plastics in the water of rivers, ponds and Wells also on the ground.
- The climate is changing because we are destroying mother earth.

These are happening because of human greed, selfishness, dissatisfaction, competition, pride, disrespect, jealousy etc.

On the other hand, we feel compassion, great respect and desire to revive our mother earth by taking care of our common home.

1. Taking care of the house and things of the community.
2. Beautifying our compound by planting plants, trees and flowers.
3. Being content with a few things.
4. Saving water and electricity.
5. Bringing some creativity with wasted things.
6. Taking care of animals, plants, trees and the smallest HB creatures.
